Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicants' election filed September 6, 2005 in response to the restriction requirement dated August 5, 2005 has been received and entered. The applicants elected the invention described in claims 1-67 and 115-117 with traverse.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-41 are drawn to a method of treating tumors or cancer in a humans in need of such treatment, which comprises: (a) a chemotherapeutic compound linked to a carrier compound by a bond or a bridging molecule and (b) irradiating a selected region of the tumorous or cancerous cells with line emission x-rays, classified in class 424, subclass 9.4.
- II. Claims 42-67 are drawn to a method of treating cancer in a human in need of such treatment, which comprises: (a) administering to the human a transfer compound which comprises a chemotherapeutic compound linked to a carrier compound by a bond or a bridging molecule, said carrier compound, bridging molecular or chemotherapeutic compound comprising a pre-selected element selected from the group consisting of Br, Ru, Gd and Pt; and then (b) irradiating at least once , by means of an end window transmission x-ray tube, classified in class 424, subclass 9.4
- III. Claims 115-117 are drawn to a method of treating tumors or cancer in a human in need of such treatment which comprises the steps of: (a)

administering to the human a compound comprising a pre-selected element: and then (b) irradiating a selected region, in which tumorous or cancerous cells are located with line emission x-rays of an energy, classified in class 514, subclass 310 and class 424, subclass 9.4.

The three inventions are independent and distinct, each from the other as they have acquired separate status in the art as shown by their separate subject matter for inventive effort. Further, a reference, which anticipates any one of the above inventions, would neither anticipate nor make obvious of the other inventions. Each such invention is capable of supporting its own patent. For these reasons, the restriction requirement is proper.

To be complete, applicants' response must include a provisional election even though the requirement may be traverse.
